LED LIGHTING

LED DOWNLIGHTERS

LD 09

LD 09

LED FLOOD LIGHTS

FL 106

FL 107

SRV Flood Lights are frequently used for street lighting, campus lighting, industrial lighting, garden lighting and play ground lighting purposes etc. These LED Flood lights are more energy - efficient, more illuminating as well as environment-friendly as compared to regular lights at a very low maintenance & working cost. These LED flood lights are made with high quality standards as well as best raw material metal core PCB, LEDs, Aluminium housing & Poly carbonate Front Lense. Srv lights consume very acute amount of electricity. These lights would light up your premises as if it is daylight.

AUTOMATIC CHANGE OVERS

KIT-KAT FUSES

ACO 270

ACO 268

ACO 266

ACO 267

Automatic changeover switch is a better alternative for traditional manual changeover switches. When the main power supply gets cut off, we usually start the generator for our input power supply. Automatic changeover switch automatically switches the power supply from main to generator. There is no need to manually shift the power supply from main to generator. We have developed a complete range of automatic changeover switches rating from 30 ampere to 200 ampere. Our automatic changeover switches are more efficient in quality & performance as compared to market products.

SRV has developed a high quality product range of domestic & industrial main switches, change overs and Bus bars rating from 16 to 400 amperes. We deliver an aligned, smooth and heavy duty switchgear range to minimize the electrical risks of sparking, short circuiting & breakdowns.

SRV is committed to procure the raw materials beyond the set standards, as well as of making & testing.

BUS BAR DISTRIBUTION BOXES

BB 260

BB 262

BB 297

BB 299

BB 296

Bus bars are often used in industrial & commercial projects.

Bus bar basically functions as a junction box by intaking power supply from a single power supply wire and distribute it in multiple directions. We have developed a complete range of bus bar chamber rating from 30 ampere to 600 ampere. Our Bus bar are more efficient in quality & performance as compared to market products.

NO RUST NO RISK

Srv has developed a high quality range of ventoguard also known as louvers / flapper in market. Ventoguard is commonly used in front of exhaust fans, Ventilation fans etc to protect our premises such as house, Industry, office & malls from dust, insects and noise. Srv Ventoguards are unique because of its durable body frame made with tata gpss sheet and a feathery light flaps using aluminium sheet (Hindalco) to work smoothly. These are available in various sizes starting from 9" to 24".
